

LITTLE ROCKETS

This is space mission control calling all the little rockets

Please crouch down in a little ball and prepare for launch

Now bounce as we count down to take off

10,9,8,7,6,5,4,3,2,1 Blastoff!

Jump into sky, jump, jump, jump jump

Put your arms out wide and fly

Jump jump jump jump

Turn to the left like a circle in the sky

Turn to the left

Now turn to the right go way up high

Turn to the right

Now tippy toes march

Tip toe tip toe

And reach for the stars

March, march, march, march

Stretch those arms up

Really stretch

Get high up on those tippy toes

Let's go.

Little rocket flying high up in the sky

Little rocket dancin' in the moonlight

Now Float around the room - You've made it to space!

Take big silly steps in slow motion.

Wave at all the other rockets floating around

Just as if the sky were the ocean

Take your left pointer finger point down at the Earth

Take your right pointer finger, point up at all the stars and say "Wow!!"

Now jog in place - as you start your space engines

Jog in place as you travel through the solar system

Jog in a circle to the left

Jog in a circle to the right

Point to a planet

Point to a moon

Point to a star

Point to the galaxy!

Little rocket flying high up in the sky

Little rocket dancin' in the moonlight

Take one hop forward

One hop back

One BIG hop forward

And One hop back

Turn two circles to the right

And you'll land back on Earth

You've landed little rockets

Welcome back to Earth

Take a deep breath and let it out

Wow little rockets

That journey was out of this world!
