What Do You See?

We could take a walk, we can call out what we see
Goin on a hike through nature, just you and me
And what we'll see is a mystery
Who knows yeah who knows
But we're on the look out for everything
Come on come on lets go

I see animal tracks, all different kinds
Fruit from the trees and a buzzing bee hive
Cross the river and the pond, tip toe tip toe
Watch the sunset now its time to go home

We could go explore the mountains or the forest trees
Think of all the things to discover, you and me
And what we'll see is a mystery
Who knows yeah who knows
But we're on the look out for everything
Come on come on lets go

I see animal tracks, all different kinds
Fruit from the trees and a buzzing bee hive
Cross the river and the pond, tip toe tip toe
Watch the sunset now its time to go home

Animal tracks, which could it be?
Bendy banana fruit from the trees,
Balance on the river, tip to tip toe
Leap from lily pads, oh here we go
Buzzing round bee hives
Climbing up the trees
Fish in the ponds splish splash with me
Time to head home when the day is done
Watch the sunset, yeah it so much fun

I see animal tracks, all different kinds
Fruit from the trees and a buzzing bee hive
Cross the river and the pond, tip toe tip toe
Watch the sunset now its time to go home
