Galaxy Groove

Get real small into a little ball so our rocket ship can fly.
Bounce up and down so we can blast off, & soar into the sky.

Side to side around the planets, left and right, yeah now you got it
Time to speed it up to turbo speed
Side to side around the planets, left and right yeah now you go it,
Time to go slow around the galaxy

Slow Slow floating through the stars
Slow Slow around venus and mars
Point up at the sky and point down at your feet
Groove real slow to the galaxy beat

Get real small into a little ball so our rocket ship can fly.
Bounce up and down so we can blast off, & soar into the sky.

Side to side around the planets, left and right, yeah now you got it
Time to go slow around the galaxy
Side to side around the planets, left and right yeah now you go it,
Time to speed it up to turbo speed

Fast fast fast we're floating through the stars
Fast fast fast around venus and mars
Point up at the sky and point down at your feet
Groove real fast to the galaxy beat

Follow me, here we go, float through outer space
And freeze!

Follow me, here we go, bounce through outer space
And freeze!

One more time, follow me, spin through outer space
And crash!
