

MAKING NEW FRIENDS

When you're up
Out of bed
And you've done all of your sleeping
And It's time to go to school
And you're not really sure what'll happen in your class
(Let me tell ya)
School will be so easy
I'm talking easy peasy

Every word every letter
Every sound you get
From the alphabet
Every plus every minus
Every single number
Will fill your mind with wonder
Now what's your favorite number!

Now jump around
Touch the sky and touch the ground
School is so much fun now
School is so much fun
Now time to read
Math at supersonic speed
Learning's so much fun now
Learning's so much fun

Every class every teacher teaches you the facts
Repetition of the facts
Every time you repeat it's worth the time and effort
You'll become a great physician
...Or even a musician!

Now jump around
Touch the sky and touch the ground
School is so much fun now
School is so much fun
There's science class
Show and tell and arts and crafts
Learning's so much fun now
Learning's so much fun

I've got a hunch
Recess comes right after lunch!
School is so much fun now

School is so much fun
You'll dance and sing
A little bit of everything
Learning's so much fun now
Learning's so much fun

School is so much fun now
Learning's so much fun
School is so much fun now
Learning's so much fun now!
