Planet Groove

There are nine planets in the universe
Circling me and you
And each one's got their own action
Each ones got their own move

Do the mercury moonwalk, and walk it out, walk it out
Venus vacation, driving all around
Earth exercise, can you pump it up, pump it up
Do the mars march from back to front

Move like the planets do
Move like they do
Move like the planets do
Move to the groove

All nine planets in the universe
Know just what to do
And each one's got their own action
Each ones got their own move

Jupiter's got those jazz hands
And Saturn spins around
Uranis marches up and down
Neptune Nod, Pluto Punch
Lets go!

Move like the planets do
Move like they do
Move like the planets do
Move to the groove

Move it like the planets, the planets do
Move like the planets, they do
Move it like the planets, the planets do
Move like the planets, they do
